

UBU Climate Change Campaign Motion

This Union Notes

1. Its own history of efforts on environmental issues, especially concerning Green Electricity, recycling and the boycotting of Esso as a major contributor to inaction on climate change.
2. The International Call-Out for action on the 3rd December, which has endorsed by groups in many countries.
3. The formation of the Campaign against Climate Change (CCC), as a broad coalition to tackle governmental inaction on the issue. That CCC has called for an England-wide demonstration in London on 3rd December. That there will be another protest in Scotland that day.
4. That local efforts are being made to ensure publicity and transport to the above protest.

This Union Believes

1. That Climate Change is a serious threat to all our student's future lives, both Domestic and International students alike, and that therefore, the student voice on this issue must be heard. It will happen within our lifetimes and everyone around the world will feel its effects.
2. That a multi-tactical approach is needed for a campaign of this scale to work, and that national mass-protests can form an important step along the way.
3. The forming of the CCC is a step forwards for the environmental movement as a whole as long as it does not inhibit other aspects or methods of environmental campaigning.

This Union Resolves

1. To continue its current work on environmental issues, especially in lobbying the University.
2. To support the demonstration, especially with publicity to member students.
3. To join the Campaign Against Climate Change if it is deemed reasonable to do so, or to explain why this isn't possible to the next council meeting.
